COLOURS	Blue (other colours available on special request)
<p>All products offer:</p> <ul style="list-style-type: none"> • SupplyPoint software • 24/7 availability • Reduced product consumption • Improved productivity • Lower inventory costs • Optimised Inventory • Convenience and simplicity 	

Standalone or Add-On

Can be used as a standalone solution or included as part of a larger SupplyPoint™ installation.

Locker Options

3 different size locker doors are available, allowing the control of a range of large or bulky items. All items are easily located by a 'pick to light process' for quick and intuitive access.

Power

The locations in the Steel Front Locker can be fitted with mains outlets, to enable items to be charged while they are stored within.

Accountability

The advanced software provides a comprehensive audit trail on item usage.

Combined with our powerful SupplyPoint inventory management software, the Steel Front Locker compliments our extensive product range to efficiently control an even greater range of your essential inventory.

EXPANDABLE AND VERSATILE

Can be specified with a mixture of different size lockers to provide between 9 and 27 secure locations in a single frame. Up to 10 frames can be connected, providing up to 270 secure locations in a single system.

MANUAL OVERRIDE

In an ideal world a manual over-ride would never be needed. However if required, it ensures 24/7 availability to all the contents with a quick and easy manual override capability allowing access to items stored within the locker

LOCKER OPTIONS

The Steel Front Locker has three standard door sizes which can be mixed within one frame to optimise capacity. If required it can be configured with windows for instant visual content inspection (Clear Front Locker).

EFFICIENCY

Multiple locations can be selected in one transaction minimising the time required to withdraw several items.

COMPATIBILITY

The locker is fully compatible with all existing SupplyPoint™ machines.

SECURITY

Access to the contents in the locker is restricted by the use of: username, password, biometric identification, card readers or a combination of these options. The door locks are of a high strength and cannot be forced open in normal or aggressive use without the assistance of tools. The items held within the locker are hidden from view and can be randomly distributed around the machine, reducing the risk of the unauthorised removal of contents.

TRACEABILITY

The powerful SupplyPoint software provides a complete audit trail allowing management to know who, what, where and why about the usage of system managed items.

POWERED LOCATIONS

Each of the cupboards can be fitted with a power outlet to allow stored equipment to be recharged. Currently 4 power outlets are available IEC, UK, French/Belgium Type E and Schuko, each column will have the same outlet.

Locker Configuration

Type	Configuration	Max power per location (if powered)
S1	9 Large Lockers	1.6 A/384 Watts
